

A CURE FOR CANCER? WHAT'S TAKING SO LONG?

Joyce Ohm

*Associate Professor of Oncology
Roswell Park Cancer Institute*

In this talk, I will walk through the pitfalls and challenges of a career in academic research with particular emphasis on the path of a scientist through the training years and transitioning to academic medicine. I will walk through the key decision points on the path to a cure and how scientists often have to juggle their desire for real progress that benefits patients and the realities and limitations of the tools that we have at our disposal. I will also talk about how both luck and failure are essential to progress and share some of the most exciting current areas of research in the cancer field!

JAN. 24, 2020

1:00 PM

OGH 220

Dr. Ohm will be available to meet with small groups of students following the seminar.
