The Center for Selective C–H Functionalization is hosting a series of symposia exploring the frontiers of this exciting field. Join us to hear talks from researchers from across the country, the Center will be broadcasting these talks live online. Each presentation will be 20 minutes long and questions can be asked online.

Find out more here: www.nsf-cchf.com/cchfvs

**Late Stage C-H Functionalization via Enzymatic Halogenation**

*Jared Lewis, Indiana University Bloomington*

**C–H Functionalization at AbbVie: Opportunities, Challenges, and Collaborations**

*Eric Voight, AbbVie*

**Boron-Based Materials as Selective Catalysts for the Oxidative DeHydrogenation of Alkanes**

*Ive Hermans, University of Wisconsin at Madison*

**Electrochemical C-H Activation by Sustainable Metal Catalysis**

*Lutz Ackermann, Georg-August-University Göttingen*

**CCHF VIRTUAL SYMPOSIUM**

**Tuesday, July 10th**

4:00 pm

**Location:**

Clark 208
